

Final Project Outline – WhatsUp Gold

Purpose – Define a reason for choosing the topic and how it relates to the class.

Scope – Present to the class what the boundaries are of the project. What is and is not in scope.

What is WhatsUp Gold? – Outline the general usage for the software in question. What does it do? Who is it for? What problems can be solved by using it?

Requirements – What are the hardware, software and database requirements for the software? In addition, what is required of the administrator in terms of experience?

Installation – Outline how to go about installation. Address any problems experienced and provide solutions for them.

Administration – What is expected of the administrator of WhatsUp Gold? Is this a “hands off” solution or does it require regular maintenance?

Demonstration – Present a short demo for using certain relevant features of the software. Discovery, reporting, status and credential management are some topic/experiments to cover.
