Final Project
CSC 1045 - Introduction to 3D Modeling and Animation
Grading: 100 points
Due Date: May. 9, 2019, 8:30am

**Description:** Your final project is to create your own 3D animation using Maya and After Effects. The final project can be anything you wish, spanning from a detailed 3D model where the animation showcases the modeling, or full motion picture that focuses on animation, movement, textures, and video. In this case, the 3D modeling would support the animation efforts.

It is expected you will have the following in the animation
1. Textured 3D models
2. Object animation, multiple camera angles
3. Audio
4. Somewhere between 10 - 30 seconds of animation
5. Movie rendered out with adobe after effects.

**Deliverables:** Submit on Blackboard.

**Grading Rubric**
30pts : Intermediate Checkup on April 24th
70pts : MOV, AVI, or MP4 of your animation
