

$$R^{\alpha\beta\gamma\delta} = \partial^\alpha \Gamma^{\beta\gamma\delta} - \partial^\beta \Gamma^{\alpha\gamma\delta} + \Gamma^{\alpha\beta\epsilon} \Gamma^{\gamma\delta\epsilon} - \Gamma^{\alpha\gamma\epsilon} \Gamma^{\beta\delta\epsilon}$$
$$G_{\alpha\beta} = 8\pi T_{\alpha\beta} \quad T_{\beta;\alpha} = 0$$
$$E_0 = mc^2$$
$$\frac{d\sigma}{d\Omega} = \sin^2\theta \frac{h^2 c^4}{m^2 v^4}$$
$$p^2 c^2 + m^2 c^4 = E^2$$

A diagram showing a circle representing a particle. A horizontal arrow labeled p points to the left from the center. A vertical arrow labeled E points upwards from the center. A diagonal arrow labeled E/c points from the center towards the top-right. The circle is labeled R on the right side.

$$E^2 = h^2 v^2 + m^2 c^4$$

A small diagram of a mushroom cloud, consisting of a flat, circular top and a vertical stem.

If I knew how to add a little
fireworks to your birthday
celebration, I certainly
would have done it,
but I failed EXPLOSIVES 210
which makes me a
Whimpering Wizzard rather
than one with Banging
expertise.

(... a little play on words there...)

Happy Birthday, Vickie

your friend
bob
