1) What gets printed by the following program?

```java
public class Quiz1 {
    public static void main(String args[]) {
        int x = 20;
        String mood = "happy";

        // "imho Quiz 1 is easy"
        // printing: "character strings go in double quotes"
        // watch out for print vs. println!

        System.out.println(" Welcome to our first quiz");
        System.out.print(" The value of x + 1 is " + x + 1);
        System.out.println(" \
or is it " + (x + 1) + ".\") ;
        System.out.println(" --- Either way, my "mood" is "
                        + mood);
        x = x + 5;
        System.out.println("x = " + x);
        System.out.println("Another value " + (7%2));
        System.out.println("And another" + (7/2));
    }
}
```

**Output**

```
Welcome to our first quiz
The value of x + 1 is 201 
or is it 21?\n--- Either way, my "mood" is happy
x = 25
Another value 1
And another3
```
1) What gets printed by the following program?

```java
class Quiz1 {
    public static void main(String args[]) {
        int x = 1;
        String mood = "happy";

        System.out.print("This is our first quiz.");
        System.out.println("Next week's will be:\nquiz " + (x + 1));
        System.out.println("--- or is it quiz " + x + 1 + ")?\n        System.out.println("Today,\nI am \" + mood + \\
        mood = mood + mood;
        System.out.println(mood);
        mood = mood + mood;
        System.out.println(mood);
        mood = mood + mood;
        System.out.println(mood);
    }
}
```

**Output**

```
This is our first quiz. Next week's will be:
quiz 2
--- or is it quiz 11?
Today,
I am \"happy\"
happyhappy
happyhappyhappyhappy
happyhappyhappyhappyhappyhappyhappyhappyhappy
```
